

# Foxes & SHEEP

Een strategische game for 2 players, 7 years and up.

**Duration :** up to 30 minutes.

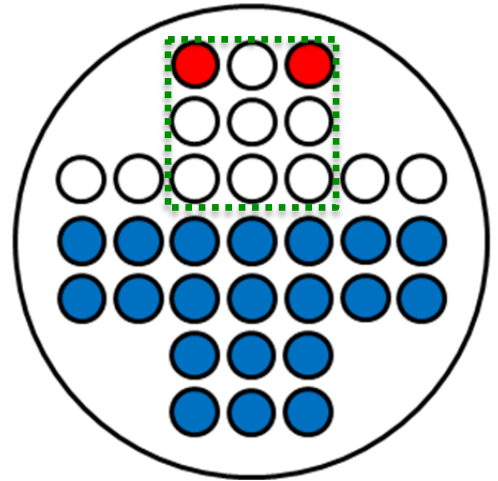

**Content :**

- 1 wooden game board.
- 2 light balls.
- 20 dark balls.

(Balls can be in reverse order – 2 dark balls and 20 light balls)

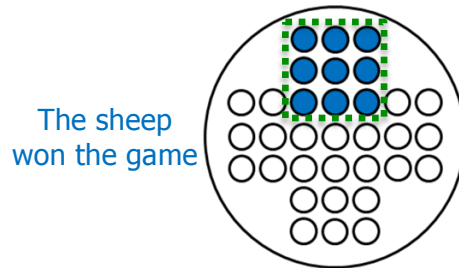

**Preparation :**

- Arrange the game board as instructed in the diagram.
- The players must decide who will use the **light balls (the foxes)** and who will use the **dark balls (the sheep)**.
- The player who plays the light balls goes first.

**Object of the Game :**

- The foxes player's objective is to remove 12 of the sheep from the game board.
- The sheeps player's objective is to conquer the 9 slots that make the top square of the board (green line).

**Playing the Game :**

The player who plays the **light balls (sheep)** goes first.

Each player gets one turn at a time and must make one move in each turn.

- The **foxes** may move in a straight or diagonal line, taking one step in each turn. They may also move backwards.  
They remove sheep from the game board by jumping over them, one at a time, in a manner similar to checkers - straight or diagonal lines.
- The **sheep** may move forwards or to the sides, taking one step in each turn. **They cannot move backwards or diagonally.**  
They protect themselves by moving into the empty slots behind them and making sure that the foxes cannot jump over them.
- The **foxes** need to try and block the **sheep** from reaching the top square of the board.
- The **sheep** need to look out and try and prevent the **foxes** from leaping over them and removing them from the board.

To make the game more interesting try playing it once as the sheep and once as the foxes.

**Good Luck!**
